Group 17 | Academic Supervisor:Dr KwehYeah Lun | Industrial Supevisor: Mr Xin Jie Tang (Agritix)

Multi-Purpose Farmer Utility App

Farmer Buddy is an all in one agri intelligence platform that combines workplace safety monitoring, an agronomist chatbot, explainable sensor insights, and AI powered leaf disease detection to help farmers work safer and smarter.

Motivation

- Worker safety risks in agricultural environments
- Difficulty monitoring field work in real time
- Lack of proof of work

Objectivs/Client's Vision

- Integrate worker monitoring and agronomic assistance in one platform
- Automate video summarization and report generation
- Improve agricultural workplace safety and visibility

App Flow/Architectural Diagram

Key Features

WSM — Body-cam live-streaming based workspace monitoring

ACB — Fully functional RAG system with an agronomist chatbot

XAI — Sensor data XAI for better comprehension of IoT device/sensor readings

LDD — Hugging face model space based leaf disease detection built on YOLO
